

FOCUS, STRENGTH, AND PARTNERING IN SAFETY

AUSTRALASIAN
SAFETY
SERVICES

Introducing Australasian Safety Services, your full-service consultancy for all aspects of occupational health and safety needs.

FOCUS ON SAFETY

At Australasian Safety Services we work with our clients in all areas of occupational health and safety. Commencing in 2002, we have specialised consultants with over 100 years of combined experience who work throughout Australia and the Asia Pacific region.

Current clients include airlines, construction, ports, transport and logistics, education, mining, tourism, defence, manufacturing, primary production, sugar milling and petrochemical.

As a company our focus is on safety as a continuous improvement, always striving forward. Safety is not just something that you do, it is a partnership with our clients to work towards desired targets and goals.

No matter what level you or your safety system is at, we will take the next step with you. We've got what you need to get the job done.

STRENGTH IN SAFETY

Our strengths are in the provision of consulting, training, occupational hygiene and environmental monitoring services at the workplace. We bring solutions that strengthen the foundations of your business.

PARTNERS IN SAFETY

Ever had an audit and then been left to sort it out alone before the next audit? This won't happen when we are partnering with you.

One of the key differences when partnering with Australasian Safety Services is that we know health and safety is an ongoing process. Between audits, we work "hands on" with our clients to help them achieve their objectives.

We also conduct both public and in-house training. We work with people. We coach, we mentor and we guide you through to achievement of your goals.

Not only do proper health and safety measures help fulfil the legal and corporate governance requirements, they also increase staff morale and reduce staff turnover.

We can assist in all industry sectors in:

Consulting

- OH&S Systems Development and Implementation

HEALTH & HEARING SERVICES

Australasian Safety Services is able to conduct on-site reference and screening audiometry of your employees Australia-wide.

Audiometric testing is conducted to the Australian Standard AS/NZS1269.4:2005 using the latest in computer based audiometric software. Reports from our testing can be provided to the employee and/or employer on the same day as the testing is performed.

All audiometric testing is undertaken by qualified personnel who are supported by our in-house audiologist.

Our audiometric testing service is part of our total hearing conservation package which includes:

- noise surveys
- noise dosimetry
- engineering controls
- reference audiometry
- screening audiometry
- EAR Fit Validation
- Custom EAR
- PPE selection
- hearing conservation training
- PPE compliance surveys

For more information or to arrange a consultation, please contact us on 1300 766 139.

SONOMAX

Sonomax is the premier custom molded, measured, and calibrated hearing protection system that is tailored to each individual ear. It provides measurable hearing protection according to the noise exposure levels of each individual at their workplace.

Sonomax plugs can be coupled with communications devices to enable staff to hear communications clearly when working in extreme environments.
